The Ultimate Graft Course:
Techniques and Biology for Hard and Soft Tissue Grafting For Optimal Implant Reconstruction

June 27-30, 2013
Ritz Carlton
Orlando, Florida

Partners in Synergy
Pikos & Salama

www.PartnersInSynergy.com
Dear Colleague,

We would like to take this opportunity to invite you to participate in our “Partners in SynergyTM - VI” Grafting Symposium, to be held June 27-30th, 2013 at the beautiful Ritz-Carlton Grande Lakes in Orlando, Florida. The theme of this meeting is: “The Ultimate Graft Course: Techniques and Biology for Hard and Soft Tissue Grafting for Optimal Implant Reconstruction”.

Once again we are extremely proud to collaborate in what we believe will be the best course you can attend to maximize your grafting results. This year we will showcase a comprehensive spectrum of total reconstructive dentistry involving both hard and soft tissue grafting techniques displayed by both an Oral Maxillofacial Surgeon and a Periodontist/Orthodontist. This rare combination of historically segregated disciplines will once again come together synergistically to the benefit of all doctors and attendees. With this being our sixth event, we have further updated our perspectives on modern regenerative dental therapies to include several forms of bioactive modifiers, modern instrumentation, technologies and living cultured cells to assist in rebuilding the scaffold for tooth replacement.

Over the years, many of you spoken to us about the fact that both hard and soft tissue grafting is the decisive factor in being able to perform more implant surgery and being able to benefit more of your patient population. In addition, the current accepted status of grafting is changing at a rapid pace with new technologies being added to established clinical protocols each year, making this course both timely and vitally important to all dentists. With this in mind, we have created a course that will comprehensively cover all aspects of state-of-the-art hard and soft tissue reconstructive dentistry, with the focus on future implant reconstruction, and the ease and long-term maintenance of prosthetic restorations.

This year, as we have in the past, we will be adding world renowned expert Dr. Eduardo Anitua of Spain, the creator of PRGF/ Plasma Rich in Growth Factors, who will highlight the most recent research and developments on this autologous blood borne bioactive modifier and its multiple uses in a clinical regenerative and facial esthetic practice.

We will share our clinical experiences with you via wide screen cinematic format that will include the use of multiple images and video clips. This three-day, intensive, total immersion concept in grafting is aimed at all disciplines in dentistry, so please feel welcome regardless of your background. An optional fourth day hands-on program is being offered as well that will include two unique hands-on training courses featuring an alveolar ridge augmentation course and a soft tissue tunneling and grafting course.

We hope to see you in sunny Florida in June, and welcome you to visit our recently updated website at www.PartnersInSynergy.com to access a preview of the course, a list of the course titles and registration information. Attendance will be limited this year to maintain intimacy for all attendees, so please plan ahead.

Respectfully yours,

Michael A. Pikos, DDS
Maurice A. Salama, DMD

"This course was an amazing union of information showing the partnership of how we as specialists can help each other to improve patient care that ultimately is the goal – hence “Partners in Synergy”.

Dr. Richard Martin, OMS, 2006 Attendee
Dr. Michael A. Pikos is originally from Campbell, Ohio. He attended The Ohio State University where he graduated Summa Cum Laude and Phi Beta Kappa. He also graduated with honors from The Ohio State University College of Dentistry. Dr. Pikos completed an internship at Miami Valley Hospital and residency training in Oral & Maxillofacial Surgery at the University of Pittsburgh, Montefiore Hospital.

He is a Diplomate of the American Board of Oral and Maxillofacial Surgery, Diplomate of the American Board of Oral Implantology/Implant Dentistry, and Diplomate of the International Congress of Oral Implantologists. Dr. Pikos is the recipient of the 2006 Aaron Gershkoff Memorial Award from the American Academy of Implant Dentistry.

He is an Adjunct Assistant Professor, Department of Oral & Maxillofacial Surgery at the Ohio State University College of Dentistry and Nova Southeastern University College of Dental Medicine. He is also a Courtesy Clinical Associate Professor, Department of Periodontology and Department of Prosthodontics at the University of Florida College of Dentistry. Dr. Pikos serves on the Editorial Board of the following journals: Implant Dentistry, Case Reports in Dentistry, and the Journal of Implant and Advanced Clinical Dentistry. He is also a member of the Scientific Board of ImplantNews magazine.

As an OMS, Dr. Pikos is one of the first clinicians to recognize the relevance of Cone Beam CT and interactive CT technology for comprehensive diagnosis and treatment planning along with its implementation for implant based oral rehabilitation. As a result, Dr. Pikos has made this high technology a cornerstone of both his private practice and institute.

Dr. Pikos has extensive experience in implant surgery and hard and soft tissue grafting procedures. He also emphasizes interactive CT technology along with foundational principles of prosthetics and biomechanics that dictate the ultimate success of comprehensive implant rehabilitation.

He is a well published author who has lectured extensively on dental implants in North and South America, Europe, Asia, and the Middle East. Dr. Pikos is an active member and frequent lecturer for the American Association of Oral and Maxillofacial Surgeons, the American Academy of Periodontics, the Academy of Osseointegration, the American Academy of Implant Dentistry and the International Congress of Implantology.

Dr. Pikos is founder and CEO of the Pikos Implant Institute. Since 1990, he has been teaching advanced bone and soft tissue grafting courses with alumni that now number more than 2,600 from all 50 states and 32 countries. Dr. Pikos maintains a private practice that is limited exclusively to implant surgery in Palm Harbor, Florida.

Dr. Maurice A. Salama completed his undergraduate studies at the State University of New York at Binghamton in 1985, where he received his B.S. in Biology. Dr. Salama received his D.M.D. from the University of Pennsylvania School of Dental Medicine where he later also received his dual specialty certification in Orthodontics and Periodontics, as well as implant training at the Brånemark Center at Penn. He is currently on the Faculty of the University of Pennsylvania and the Medical College of Georgia as Clinical Assistant Professor of Periodontics, and is a visiting Professor of Periodontics at Nova Southeastern University in Florida.

Dr. Salama has completed an ADA accredited hospital-based General Practice Residency at Maimonides Medical Center in New York City. He has had the opportunity to further broaden his clinical horizons through externships at Hadassah Hospital, Hebrew University in Jerusalem and Beth Israel Hospital in New York City in 1988, and has been a contributor to the dental literature. His very unique background includes specialized training in Orthodontics, Periodontal Surgery, and Implant Dentistry.

Dr. Salama is a partner in the Atlanta Esthetic Dental Practice known as “Team Atlanta”. His partners include Dr. David Garber, Dr. Ronald Goldstein and his brother, Dr. Henry Salama. This group has an international reputation for interdisciplinary care, dental education and has published hundreds of articles and several text books. Dr. Salama is a featured Xpert content provider and member of the Scientific Committee of the leading web based dental education site www.DentalXP.com.

Dr. Salama served as the Dental Expert for Channel 5 Fox TV in Atlanta. He is an active member in the American Association of Orthodontists, the American Academy of Periodontics, the Academy of Osseointegration, the American Academy of Esthetic Dentistry, and the American Academy of Implant Dentistry. Recently, Dr. Salama has been a speaker at programs for the Academy of Osseointegration, the American Association of Orthodontists, the American Academy of Periodontology, the American Academy of Esthetic Dentistry, the Interdisciplinary Care Conference presented by five Academies, the American Academy of Cosmetic Dentistry, Alpha Omega International, and the Chicago Dental Society.

“You guys were awesome! I did not expect to be blown away but I was. Perfect mix of science, literature, slides, cases, mistakes, complications, recognition of colleagues, and humor. I couldn’t believe how much new material. The take-home is terrific.”

Dr. Paul Kozy, GP, 2011 Attendee
Upon completion of the course, participants will be able to:

**Day 1: Hard Tissue Reconstruction**

- Describe the anatomy, biology, wound healing and timing of bone grafting, and host response to surgery.
- Describe importance of flap design and soft tissue manipulation for successful bone grafting.
- Understand and apply the principles of interactive CT diagnosis and treatment planning for soft tissue and hard tissue grafting procedures.
- Successfully place implants into patients with compromised hard and soft tissue anatomy.
- Understand indications and step-by-step surgical protocols for mandibular block grafting, mesh particulate grafting, ridge expansion, and sinus grafting.
- Understand the expanding application of BMP-2 with intraoral bone grafting.
- Understand the role of mandibular block grafts, mesh particulate grafts, and ridge expansion in treating the deficient alveolar ridge.
- Understand predictable bone grafting protocols for vertical ridge augmentation.
- Understand the surgical protocol for sinus bone grafting in the presence of pathology.
- Conclude what is evidence-based and what is opinion with regard to state-of-the-art autogenous block grafting, mesh particulate grafting, ridge splitting, and sinus grafting.
- Understand the utilization of ultrasonic and piezosurgical approaches to different regenerative techniques including: bone harvesting, ridge splitting, sinus grafting, and osteotomy preparation.
- Prevent, recognize, and treat mandibular block graft, mesh particulate graft, ridge split, and sinus graft complications (intraoperative, early post-operative and late post-operative).
- Understand the implications and timing of bisphosphonate therapy with bone grafting and implant treatment.

**Day 2: Soft Tissue Reconstruction**

- Describe the anatomy, biology, wound healing and timing of graft, and host response to surgery.
- Develop the most appropriate flap design to maximize blood supply for each procedure.
- Describe the guidelines, indications, and surgical protocols for performing the following procedures: gingival grafts, subepithelial connective tissue grafts, and acellular dermis matrix allografts.
- Understand the long term results and utilization of allograft ACDM vs. autogenous soft tissue material for gingival augmentation (i.e., Alloderm, Dermis, Pericardium).
- Be able to perform common first and second stage implant soft tissue procedures to optimize esthetics and long term maintenance.
- Use appropriate suture and suturing techniques related to soft tissue and hard tissue grafting.
- Understand and apply the most recent research regarding the utilization of Allogeneic Cultured Keratinocytes and Fibroblasts for Oral Soft Tissue Regeneration and their utilization in modern clinical practice.
- Understand and utilize autologous blood-borne bioactive modifiers for optimal regenerative results.
- Develop the skill to advance flaps through split thickness and periosteal sharp dissection.
- Prevent, recognize, and treat complications related to soft tissue grafting.

**Day 3: Esthetic Zone Reconstruction**

- Understand, describe, and utilize the appropriate surgical and prosthetic principles involved for comprehensive site development in the esthetic zone.
- Understand comprehensive extraction site management – predictable and evidence based.
- Describe indications and protocols for immediate vs. delayed implant placement in the esthetic zone.
# The Ultimate Graft Course: Continuous Interactive Dialogue with Drs. Pikos and Salama

## Sunday, June 30, 2013 - Hands-On Workshops (Optional)

**Michael A. Pikos, DDS**  
Alveolar Ridge Regenerative Strategies: Titanium and Sonic Weld Mesh with BMP-2 and Particulate Allograft  
8:00 am – 12:00 pm  
Hands On Training

**Maurice A. Salama, DMD**  
Critical Soft Tissue Techniques: A Hands-On Course  
8:00 am – 12:00 pm  
Hands On Training

*This is a preliminary schedule and is subject to change. The final schedule will be provided at the event.*
Anatomy and Biology of Bone Grafts
- Indications / Application of Bone Grafting Techniques
- Interactive CT with Direct Clinical Application
- Tissue Engineering: Clinical Relevance
- Hard Tissue Ridge Augmentation
- Autogenous Mandibular Block Grafting
- Sinus Grafting
- Ridge Expansion
- Tibial Bone Grafting
- Mesh/Particulate Bone Grafts: Autogenous vs. Allograft vs. Xenograft
- Bioactive Modifiers - PRGF, PRF, PDGF, BMP-2

Anatomy and Biology of Specific Soft Tissue Grafts
- Epithelialized Palatal Free Graft (FGG)
- Subepithelial Connective Tissue Graft (CTG)
- Acellular Dermal Matrix (ADM)
- Lateral Pedicle Grafts (LPG)
- Semi-Lunar Grafts (SLG)
- Papilla Grafting
- Inlay/Onlay Soft Tissue Grafting for Pontic Sites
- 1st and 2nd Stage Implant Soft Tissue Procedures
- Pre Bone Graft Soft Tissue Augmentation

Harvesting / Grafting / Suturing
- Indications / Applications
- Armamentarium
- Step by Step Techniques
- Surgical Stents and Biological Glues
- Selecting the Correct Treatment Approach

Vertical Bone Augmentation Therapies
- Orthodontic Extrusion
- GBR with Titanium Membranes
- Mesh/Particulate/Bioactive Modifiers with emphasis on BMP-2
- Onlay Block Grafting
Course Outline

Esthetic Zone Reconstruction: The Management of Hopeless Teeth
• Interactive CT Diagnosis and Treatment Planning
• Extraction Site Treatments
• Orthodontic Considerations
• New Extraction Techniques
• Alveolar Ridge Preservation and Augmentation
• Pontic Site Development
• Simultaneous vs. Delayed Implant Placement
• Hard and Soft Tissue Grafting: Staged vs. Simultaneous
• Ridge Expansion
• 3D Ridge Augmentation

The Role of Biologic Modifiers
• PRGF, PDGF, PRF, PRP, BMP-2 and Related Growth Factors

Bisphosphonate Therapy and Bone Grafting

Smile Design and Considerations: The 10 Steps to Esthetic Zone Reconstruction
• Esthetic Evaluation
• Interactive CT Diagnosis and Treatment Planning
• Additive vs. Resective Therapies
• Crown Lengthening vs. Simple Gingivectomy
• Radiosurgery vs. Lasers
• Root Coverage vs. Ridge Augmentation
• Teeth vs. Pontic vs. Implants and the Role of Bone Sounding
• Prognostic Indicators Based on Clinical Research

Case Reports and Treatment Planning Strategies

Problem Solving...The How To's

Complications of Soft and Hard Tissue Grafting

Patient Management Issues

Questions & Answers

“This course is a beautiful blend of pertinent relative literature review and the vast clinical experience of Drs. Pikos & Salama culminating in the best course on the management of the hard and soft tissues for implant reconstruction I have ever attended.”

Dr. Steve Aragon, OMS
2007 Attendee

“Pikos and Salama are two of the best educators in all of dentistry. Put them together and you have an extravaganza.”

Dr. John Sottosanti, Cofounder and Moderator of the USC Annual Periodontal Symposium; Associate Clinical Professor, USC School of Dentistry
Optional Program: Limited Attendance Hands-On Training

Alveolar Ridge Regenerative Strategies: Titanium and Sonic Weld Mesh with BMP-2 and Particulate Allograft with Dr. Michael A. Pikos

Mesh particulate grafting must be integrated into treatment planning by today’s implant surgeon to effectively treat patients with compromised alveolar ridges. This clinically-based hands-on technique course will draw on the speaker’s 30-years of experience with bone grafting. The indications, contraindications, and surgical protocol for titanium and Poly-DL lactide (Sonic Weld) mesh with BMP-2 and particulate allograft for alveolar ridge augmentation will be featured with step-by-step hands-on surgical protocols.

Flap design and soft tissue management will be reviewed along with comprehensive site development evaluation including the use of cone beam CT and detailed clinical examination. Recognition, management, and prevention of complications associated with mesh/BMP-2 particulate grafting will be covered.

Objectives:
• To understand the indications for mesh/BMP-2 particulate grafting for alveolar ridge augmentation.
• To understand and apply the surgical protocol for utilization of mesh/BMP-2 particulate grafting for alveolar ridge augmentation.
• To recognize, manage and prevent complications associated with mesh/BMP-2 particulate grafting.

Critical Soft Tissue Techniques: A Hands-On Course by Dr. Maurice A. Salama

Part and parcel of a thorough dental evaluation today is determining the gingival phenotype of the individual. Thickness of the gingiva, zone of attached tissue, and tissue color all play important roles in developing the long-term health and esthetics in dental treatment of any kind. The exact determination of the location of the underlying bone acts as a prognostic indicator of future soft tissue levels.

Soft tissue grafting techniques, new regenerative materials and bioactivators will be highlighted. The expanding role of allograft materials (Alloderm, Dermis, Pericardium) and when to utilize them will be suggested. The ability of these combined protocols to alter the soft tissue profile around natural teeth, implants, and edentulous ridges, as well as to support facial soft tissue structures, will be reviewed as to their critical role in “Complete Esthetics”.

This hands-on course will highlight the three most utilized soft tissue procedures in clinical practice, the socket graft, ridge augmentation, Palatal CTG Harvest and the “tunnel” root coverage procedures. It will teach in detail and simplify the process of site evaluation, critical anatomy, flap design, harvest techniques and suturing.

Objectives:
• To learn basic surgical anatomy, incisions, and tunnel techniques in soft tissue surgery.
• To apply three commonly-used soft tissue grafting techniques in clinical practice.
• To learn critically important modified suturing methods to secure flaps and grafts.

“When it comes to all aspects of bone, tissue and implants, there are none better, more experienced and knowledgeable than Team Pikos Salama! The Best!”

Dr. Burr Bakke, GP, 2011 Attendee
Partners in Synergy has contracted again with the Ritz-Carlton Grande Lakes in Orlando for our 2013 event. Be certain to identify yourself as attending the Partners in Synergy course to receive the special room rate of $169 per night. If you would like to make your reservation online go to www.PartnersinSynergy.com and select the “Venue” button. (Please make your reservation early, as the room block will fill quickly.)

Hotel Accommodations Include:
- Five Onsite Restaurants
- Greg Norman-designed 18-hole Championship Golf Course
- Outdoor Heated Pools and Whirlpools
- The Ritz-Carlton Spa
- Lazy River Pool Boat Rides
- Tennis Courts
- Fitness Center
- Jogging Trails
- Sand Volleyball Court

Directions from Orlando International Airport
1. Follow “North Exit” signs out of the airport.
2. Take 528 West (Beachline).
3. Exit 3 (John Young Parkway South/423) off 528 (Beachline).
4. At bottom of exit, turn left onto John Young Parkway.
5. Turn right onto Central Florida Parkway (2nd traffic light).
6. Entrance to Grande Lakes Orlando will be on the left.

Late Arrival Notice
If you will be unexpectedly delayed in arriving, you must contact the hotel as soon as possible to ensure your room reservation.

The Ritz-Carlton Spa
Discover the healing powers of citrus-inspired beauty treatments amid a lush garden landscape. Lose your cares in The Ritz-Carlton Spa® Orlando, Grande Lakes featuring 40,000 square feet dedicated to rejuvenation. This unique Orlando spa offers a relaxing retreat from the world outside - a place where the sense of touch can relax the spirit and refresh the soul. Open for the enjoyment of hotel guests, event attendees, and Orlando residents alike, The Spa offers a variety of soothing indulgences.

Championship Golf Course
Experience a challenging and beautiful Orlando golf course with unprecedented personal attention. Be our guest at The Ritz-Carlton Golf Club® Orlando, Grande Lakes and experience the thrill of an 18-hole, par-72 Greg Norman Signature Golf Course, set in a natural world of wonder and seclusion. Set within the pristine Headwaters of the Florida Everglades and surrounded by magnificent pines, palmettos, and live oaks, this distinguished Orlando golf resort offers a luxury experience unlike any other in the area.

Private Guided Eco-Tours on Shingle Creek
Traveling back in time on Shingle Creek, guests will enjoy a two-hour Guided Canoe and Kayak Eco-Journey. Our Water Guides will tell you the story of Shingle Creek and all its inhabitants while paddling through scenic old Florida. Includes use of all water craft, equipment, and safety gear for your travels.

Cancellations must be made in writing by May 1, 2013 to receive a refund. After May 1, 2013 there will be a $1000 cancellation fee. A $25 administrative fee will be charge for substituting a registrant.

The Pikos Implant Institute has been designated an Approved PACE Program Provider by the Florida Constituent of the Academy of General Dentistry. As such, this program provider’s continuing education is accepted by the AGD for credit applicable toward membership maintenance throughout the U.S. and Fellowship/Mastership credit for the state of Florida. The approval of program providers does not imply endorsement by the Academy of General Dentistry of course content, products, or therapies presented.
“I’ve already said it – you guys are killer. I paid, I came, and it is greater than the sum of its parts – worth every penny.”

Dr. Hal Kruegar, OMS, 2011 Attendee

“Michael Pikos and Maurice Salama are an unbeatable combination for teaching current concepts in bone and soft tissue grafting for the best implant outcomes in difficult settings. Each is an experienced and talented clinician who presents practical solutions for complex problems. Their expertise in interdisciplinary treatment planning combined with their surgical skills and teaching abilities make for a unique learning opportunity.”

Dr. Pat Allen, Founder of the Center for Advanced Dental Education

“Partners in Synergy is like having Thomas Edison, Albert Einstein, Michelangelo and Picasso together in one course. Experience, science, knowledge and beauty combined to create the ultimate “state-of-the-art” masterpiece.”

Dr. Jimmy Londono, Prosth, Martinez, GA
2009 Attendee
